

HOW LOW CAN THEY GO?

STATE CIVIL, TORT, MEDICAL MALPRACTICE AND PRODUCTS LIABILITY CASELOADS AND JURY TRIALS

Many states (but not all) compile annual civil case filing and jury trial statistics, and provide their data to the National Center for State Courts (NCSC). Together, these data present the most accurate overview of our nation's state-based civil justice system. According to averages calculated from the most recent data released by NCSC:

CIVIL CASES

- Civil cases represented 18.1 percent of incoming cases in state trial courts in 2016.¹
- Between 2007 and 2016, civil caseloads in state trial courts fell by 16 percent.²
- “Between 2009 and 2015, civil caseloads fell by over 4 million cases, an annual rate of about -3.5 percent. However, reported caseloads for 2016 were only 1 percent below the previous year, suggesting that the end of the decline may be near.”³

TORT vs. CONTRACT CASES

- Tort cases represented only 4 percent of state court civil caseloads in 2017.⁴ This rate is consistent with NCSC data from the previous five years.⁵
- Contract cases – not tort cases – “dominate the civil landscapes,” comprising 47 percent of state court civil caseloads in 2016.⁶

MEDICAL MALPRACTICE AND PRODUCT LIABILITY CASES

- Medical malpractice cases represented only 0.14 percent of state *civil* caseloads in 2017.⁷ This rate is consistent with NCSC data from the previous five years.⁸
- Medical malpractice cases represented only 3.9 percent of state *tort* caseloads in 2017.⁹ This rate is consistent with NCSC data from the previous five years.¹⁰

- Product liability cases represented only 1 percent of state *tort* caseloads in 2016.¹¹
- “Malpractice and product liability together account for just 5 percent of *tort* caseloads and that varies little among states” in 2016.¹²

JURY TRIALS

- The percentage of *civil* cases resolved by jury trial in state courts was only 0.21 percent in 2017.¹³ This rate is consistent with NCSC data from the previous five years.¹⁴
- The percentage of *tort* cases resolved by jury trial in state courts was just 1.5 percent in 2017.¹⁵ This rate is consistent with NCSC data from the previous five years.¹⁶
- The percentage of *medical malpractice* cases resolved through jury trial in state courts was only 6.1 percent in 2017.¹⁷ This rate is consistent with NCSC data from the previous five years.¹⁸

NOTES

¹ This percentage comes from NCSC’s examination of data from state trial courts in all 50 states plus the District of Columbia, Puerto Rico and Guam. National Center for State Courts, “Composition of Incoming Cases, All Trial Courts, 2016,” <http://www.courtstatistics.org/~media/Microsites/Files/CSP/National-Overview-2016/EWSC-2016-Overview-Page-4-Comp.ashx>; National Center for State Courts, “Number of Incoming Cases, by Case Category and Tier, 2016 (in Millions),” <http://www.courtstatistics.org/%7E/media/Microsites/Files/CSP/National-Overview-2016/EWSC-2016-Overview-Page-5-Table.ashx>
